

Aarav Shah

Frontend Developer | React • TypeScript • Accessibility

Pune, Maharashtra | aarav.shah@example.com | +91 00000 00000 (demo number)

Profile

Frontend developer with 3 years of experience building web interfaces for business software. I enjoy turning complex workflows into clear, accessible screens and working closely with designers and backend developers.

Skills & tools

JavaScript, TypeScript, React, HTML, CSS, responsive UI, accessibility, REST APIs
Git, Figma, VS Code, Jest, Jira

Experience

Frontend Developer | Northstar Labs (fictional)

October 2024 - present

Built reusable React components for an internal operations dashboard. Worked with designers on responsive layouts and keyboard navigation. Added component tests and reviewed API integration with the backend team.

Junior Web Developer | Cedar Digital (fictional)

October 2023 - September 2024

Developed responsive pages with HTML, CSS, and JavaScript. Fixed layout issues, maintained shared components, and supported quality checks before release.

Selected project

Operations dashboard - React and TypeScript interface for managing service requests, with filters, form validation, accessible controls, and role-based screens. Illustrative project description; no public repository is attached.

Education

B.Tech, Computer Science | Westbridge Institute of Technology (fictional)
2023 | CGPA: 8.2 / 10

Languages & availability

English, Hindi, Marathi (read, write, speak). Notice period: 30 days, negotiable subject to employer approval. Prefers Pune or Bengaluru; hybrid or remote work.

All employers, education records, work history, contact details, and achievements in this CV are fictional.
